

Labuan Bajo Ornament Design: Embracing Natural Beauty and Cultural Heritage in Contemporary Design

Embracing Natural Beauty and Cultural Heritage in Contemporary Design

Inspired From Labuan Bajo

Labuan Bajo is one of Indonesia's new tourist attractions with its natural treasures and unique local heritage.

The 3 main motifs in this work are inspired by traditional building, flora, and fauna from Labuan Bajo, namely Mbaruniang, which symbolizes a form of human harmony with nature; Api-api Putih, as a symbol of adaptability to its environment; and Kakatua Jambul Kuning, a symbol of life with enthusiasm and full of exploration. By incorporating elements inspired by the local culture and scenery, I aim to create a visual experience that resonates with the tranquility and charm of Labuan Bajo.

ID 463 Labuan Bajo Ornament Design: Embracing Natural Beauty and Cultural Heritage in Contemporary Design

Fauziyah Illahi

Using the technique of symmetrical composition, the design style that I take tends to be feminine with many curves from each line made. In this work I want to lift the beauty of Labuan Baju with a comfortable and calm atmosphere.
